About Me

I'm very passionate about web technology and currently focused on front-end development. I'm in my third year of college at Brigham Young University, Idaho where I have learned the core of programming. I have improved my skills by taking various courses on the internet and LinkedIn and by applying this knowledge to projects.

Education

2019 – 2021 B. S in Applied Technology
Brigham Young University, Idaho.
Pursued my passion for software development through three certificates, computer programming, web development and databases.

Experience

English Tutor

2018 – 2021 Taught English to students from 5 years old to 50 years old. An amazing experience where I had to adapt to the students' needs in order to have a personalized lesson with them.

Volunteer Service

2014–1016 I served as a volunteer missionary for the Church of Jesus Christ of latter-day saints in Nagoya, Japan. Here I learned English and Japanese at an advanced level. Also learned to teach people in the most effective ways and to be a leader.

Skills

Programming Languages:

HTML, XML, CSS, JavaScript, Python, Java, SQL.

Frameworks and Libraries:

Bootstrap, Material-ui, React.js, React-spring.

Tools:

Git, GitHub, Trello, Slack, Bitbucket, Netlify.

Disign:

Illustrator, Photoshop, InDesign.

LinkedIn Courses

Become a Software Developer
Become a Web Developer
SQL Essential Training
Become a Front-End Developer
